This is a graduate-level, 4-credit, 60-hour seminar on use of technology, methodology and culture in Italian language teaching.

Preparing teachers for competing in today's digital humanities age, this seminar helps language instructors improve their teaching strategies by illustrating the latest approaches to use of the internet and technology in second language acquisition and by introducing innovative methods of language and culture instruction.

Upon successful completion, participants will receive 4.0 graduate credits from The American University of Rome, an American institution that has been operating in Rome for more than 45 years and is accredited by Middle States Commission on Higher Education

The course is divided between lab practicum, theory and practical in-class activities and will be offered fully in Italian, making it of interest to teachers of Italian at all levels (university, high school and middle school) interested in updating their pedagogical methodology in the classroom.

- ❑ **Earn 4 graduate credits**
- ❑ **Offered entirely in Italian**
- ❑ **Improve your Italian Language and Culture Teaching Methodology**
- ❑ **Learn how to use Technology in the Language Classroom**
- ❑ **Qualified and experienced instructors**
